

Go from scratch: Beginners-Friendly Guide

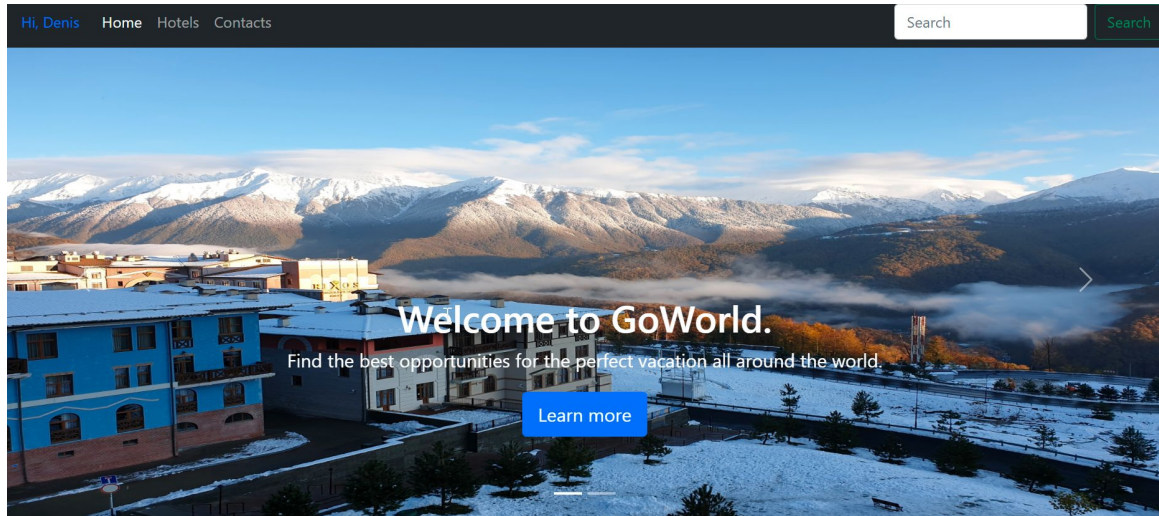

by Denis Shchuka

Final Project

The Idea

GoWorld - Online Booking System that provides API for external partners to register new hotel propositions

What you will learn

- How to develop web applications with Go
- How to structure your project
- How to use external frameworks and libraries like **Gin** or **pgx**
- How to expose functionality of your application via API
- How to work with databases
- How to style your application with **Bootstrap** framework

Go from scratch: Beginners-Friendly Guide
